EXPERIENCE

Software Developer Intern

CODE N CREATIVE

📅 Apr 2025 – Nov 2025

- Built scalable AI systems by developing a Vector AI Database with a full RAG pipeline for Koby's AI and contributing to the production-ready Markzy platform, improving retrieval accuracy by 12%.
- Designed high-volume API architecture, managing data flow from 100+ APIs and optimizing Data services for faster, more reliable responses, reducing inconsistencies by 10%.
- Collaborated with engineering teams to deploy stable backend and AI pipelines, to improve system reliability by 8%.

PROJECTS

Markzy – AI Marketing Automation Platform

next.js, typescript, node.js, mongodb, stripe

- Developed a full-stack AI marketing platform integrating 100+ AI content-generation APIs, like social posts, blogs, emails in real time.
- Engineered a scalable backend using Node.js and caching, improving API speed by 12% and supporting secure JWT-based authentication.
- Designed a clean, responsive dashboard using Next.js and Tailwind, enabling smooth workflow automation and improving overall user productivity.

Koby's AI – RAG-Powered PDF Q&A System

python, django, faiss, google gemini api, mongodb, html/css/js

- Built a RAG-powered PDF knowledge system converting documents into searchable intelligence using FAISS vector search and AI embeddings.
- Created a robust pipeline for PDF extraction, chunking, and vector indexing, improving search accuracy and response quality by 18%.
- Added secure login, role-based access, and a responsive UI, enhancing reliability and improving user navigation efficiency by 12%.

VisionSpeak AI – Video & Audio Analysis Platform

python, django, whisper, mediapipe, deepface, huggingface, html/css/js

- Developed an AI-driven analysis platform providing transcription, sentiment, emotion, and pose tracking for video/audio content in real time.
- Built a multimodal engine combining Whisper for voice analysis, MediaPipe for pose tracking, and DeepFace for emotion detection.
- Delivered a smooth, responsive interface with HTML/CSS/JS, improving user interaction and dashboard usability by 18%.

EDUCATION

B.Tech in Computer Engineering

ITM Skills University

📅 August 2023 – August 2027

Higher Secondary (HSC)

Pratibha Srijan Peeth, Pachore, Madhya Pradesh

📅 April 2021 – April 2023

Secondary School (SSC)

Kendriya Vidyalaya, Bina, Madhya Pradesh

📅 April 2011 – April 2020

SKILLS

C++ Python Django FAISS
Vector Databases RAG ML
React.js Typescript JavaScript
Node.js Express.js REST API
MongoDB Firebase
HTML CSS GitHub AWS

ACHIEVEMENTS

- Won a college website development competition, securing an internship opportunity at Let's Upgrade.
- Achieved a 3-star rating on HackerRank, showcasing strong problem-solving skills and coding proficiency.
- Community Engagement Associate – Actively contributed to Swift Mumbai, fostering developer collaboration.
- Engaged with Google Developer Group Community - Mumbai, participating in tech events and networking with industry experts.

CERTIFICATIONS

- Academy Accreditation - Generative AI Fundamentals (Feb 2025)
- Java Certificate – HackerRank (Oct 2024)
Certification ID: 3935CE68EF6B
- Goldman Sachs | Software Engineer Job Simulation (Sep 2024)
